I. SUMMARY

A product designer obsessed with visual craft — 24 years making complex software beautiful — typography, spacing, color, motion, and the interaction details most teams never get to. Deep history in regulated healthcare and enterprise products: core contributor to **GE Healthcare's** Edison Design System (2020 Red Dot for Interface Design), builder of **Blue Cross Blue Shield's** FIBER system, cross-platform component work at **Verizon** spanning iOS, Android, and web, delivered hand-in-hand with engineering. Deep design-systems background — five built, plus contributions inside mature systems at GE and Verizon — carried today as fluency: comfortable in any system, focused on making the work inside it exceptional. Works AI-forward: Claude Code for prototypes and production front-end, Figma Make for rapid clickable concepts, and agent workflows for multi-step production and documentation — with every craft decision staying human. Accessibility (WCAG) built in by default. Principal Designer at **PBK Studio**. *Complex software, made beautiful, built to scale.*
