PROTECTION, GUIDANCE, & COMPASSION

What is a Design Systems Purpose?

A Design System is created to bring **order** and **consistency** to our designs. They help to protect the brand, elevate the user experience, and increase the speed and efficiency of how we design and build our products.

THE PROBLEM

Disjointed components with no real visible path to constructing the design to developers specifications.

THE SOLUTION

A system of elements and code that help produce a seamless and accurate mockup, prototype or site design without error or quesiton.

SEPTEMBER 2019

THE OBJECTIVE

To create a strong foundation to construct our outward facing website design, structure and code to create a seamless process from Design to Development.

FINAL ABILITY

A design system that contains all colors, type, grids, icons and components to quickly build out any outward facing website or prototype.

SEPTEMBER 11, 2019

Adoption is Critical

In order for a design system to work properly it is imperative to make sure everyone involved uses the same **vocabulary** and **sources** for the project they create. Communicate often and clearly.

Let's Explore the System

A guide – built into the file will help maintain the brand design & specs.

F I B E R

USER GUIDE V0.4

Welcome:

The *FIBER* Design System is created to bring **order** and **consistency** to our outward facing products. It will help to protect the brand, elevate the user experience, and increase the speed and efficiency of how we design and build our products going forward. Please use this file as your guide for developing any public facing websites you create.

Instructions:

1. Set up work accounts & install the following sketch Plug-ins: **InVision** and **Craft**
2. Copy the appropriate grid template from the "Grid" page and place in "YOUR TEMPLATE" page.
3. Place needed elements from the "Insert" menu in the upper left. i.e. headers, icons, modals, etc
4. When placing type - use the "Text Styles" menu drop down in the upper left for the type library.
5. Once your design is created - you can upload to InVision for review and shareholder comments.

1. Accounts & Plug-ins

These accounts & plug-ins will streamline product design and decrease time for Review, Updates, Animations and Code output for developers to use directly.

Please follow the links to the **right** to download and install the helpful plug-ins. Once installed you will have the flexibility to use them in various ways.

If if you would like to learn more - each site has video demos on how the plugin/account works.

The InVision website and app helps display all of your prototypes in a clean interface which shareholders can comment and updates can be easily made and viewed in real time.

www.invisionapp.com

Craft helps connect Sketch and upload all of your prototypes to InVision - plus prototype, DSM, Data, Stock Images and Freehand live sketch sessions.

Color:

You will access your brand designated color palette by navigating to the **“Insert + / Document / Color”**. You will have all options from Brand, Primary Interaction, Neutral and Gradient colors that pertain to your project.

If you need an expanded color palette for any new client or product - please contact DUET / FIBER team to have them added to this master template. Whomever holds the “master document”

NOTE: We will be expanding the Brand Colors as we add more projects to the template for individual departments and brands.

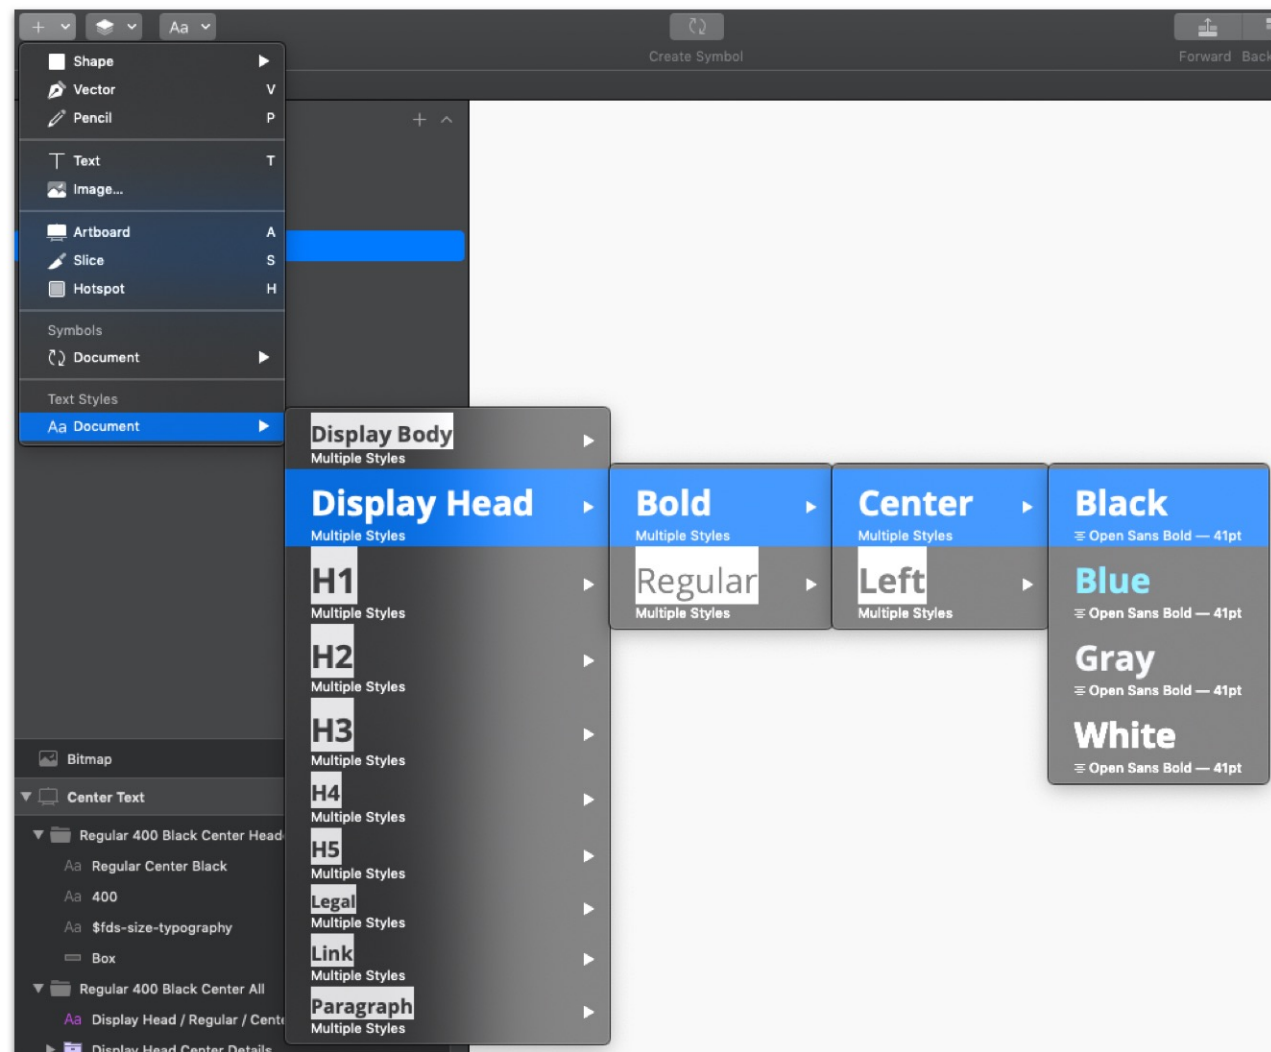

FIBER CONTRAST GRID: [CLICK HERE](#)

Typography:

You will access your brand designated Typography Styles by navigating to the **“Text Styles”**. You will have all options from Display Header, Body, H1, H2, H3, H4, H5, Legal, Link and Paragraph.

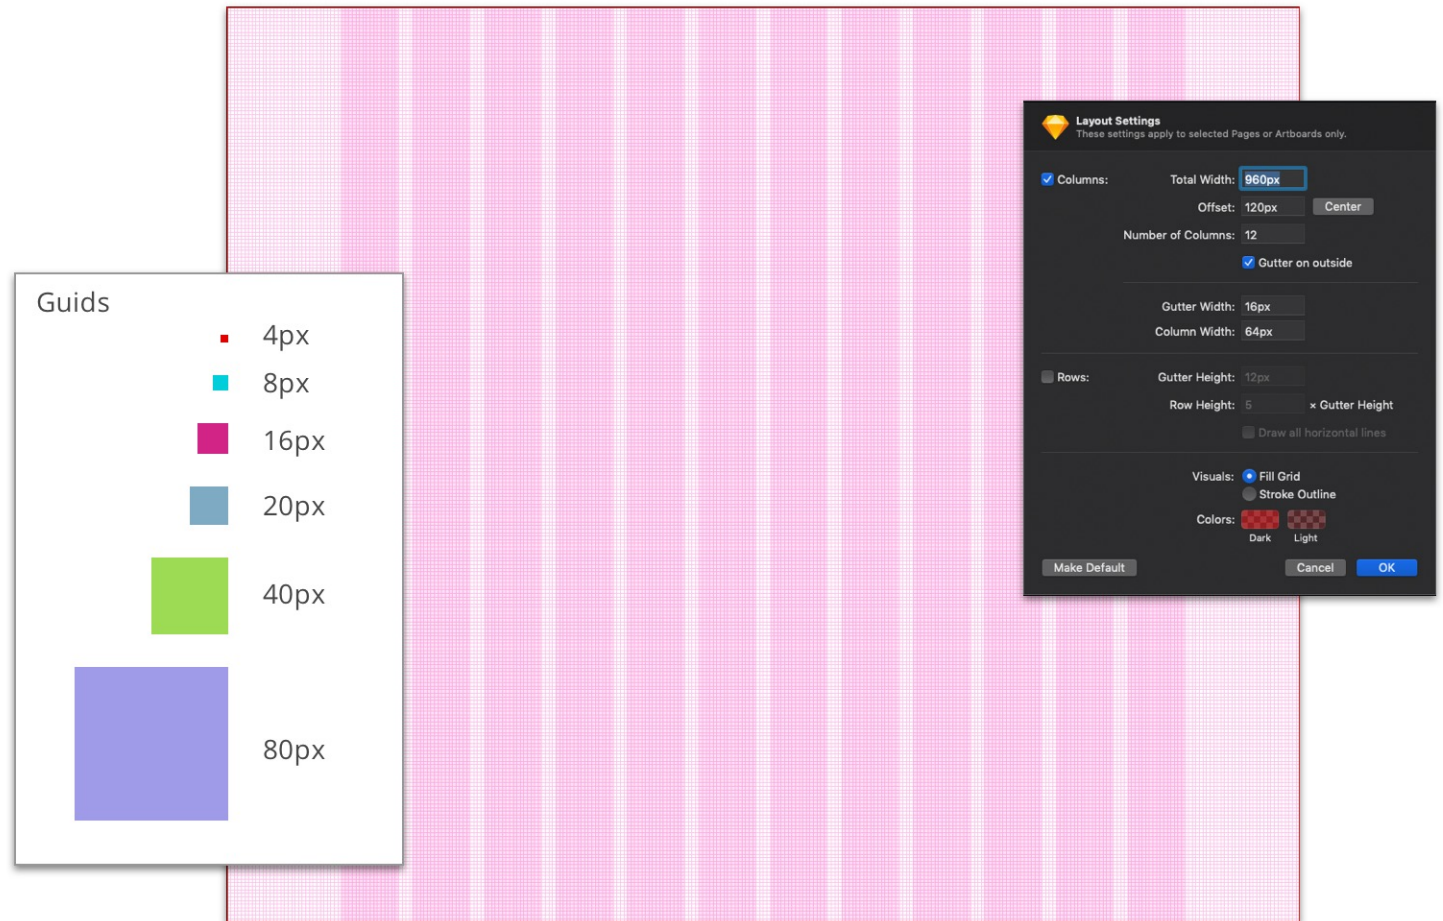

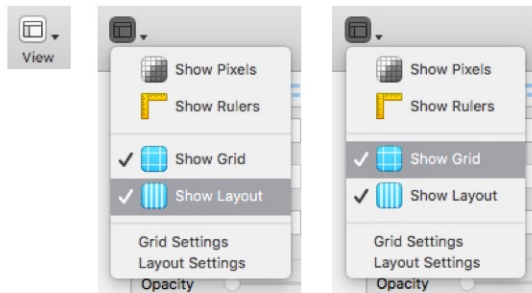

If you need an expanded type library for any new client or product - please contact DUET / FIBER team to have them added to this master template.

Grid:

Under the page labeled “Grid” you will see the various sizes that you would need for the your various platforms - HD Desktop, Desktop, Tablet and Mobile. Please follow the 4 pixel / 12 column layout at all times to maintain design consistency. Remember - its about user experience.

To get started with your design - copy and paste the artboards you will need into your template page. You can toggle seeing the columns and grid by selecting the **“View / Show Layout”** and **“View / Show Grid”**

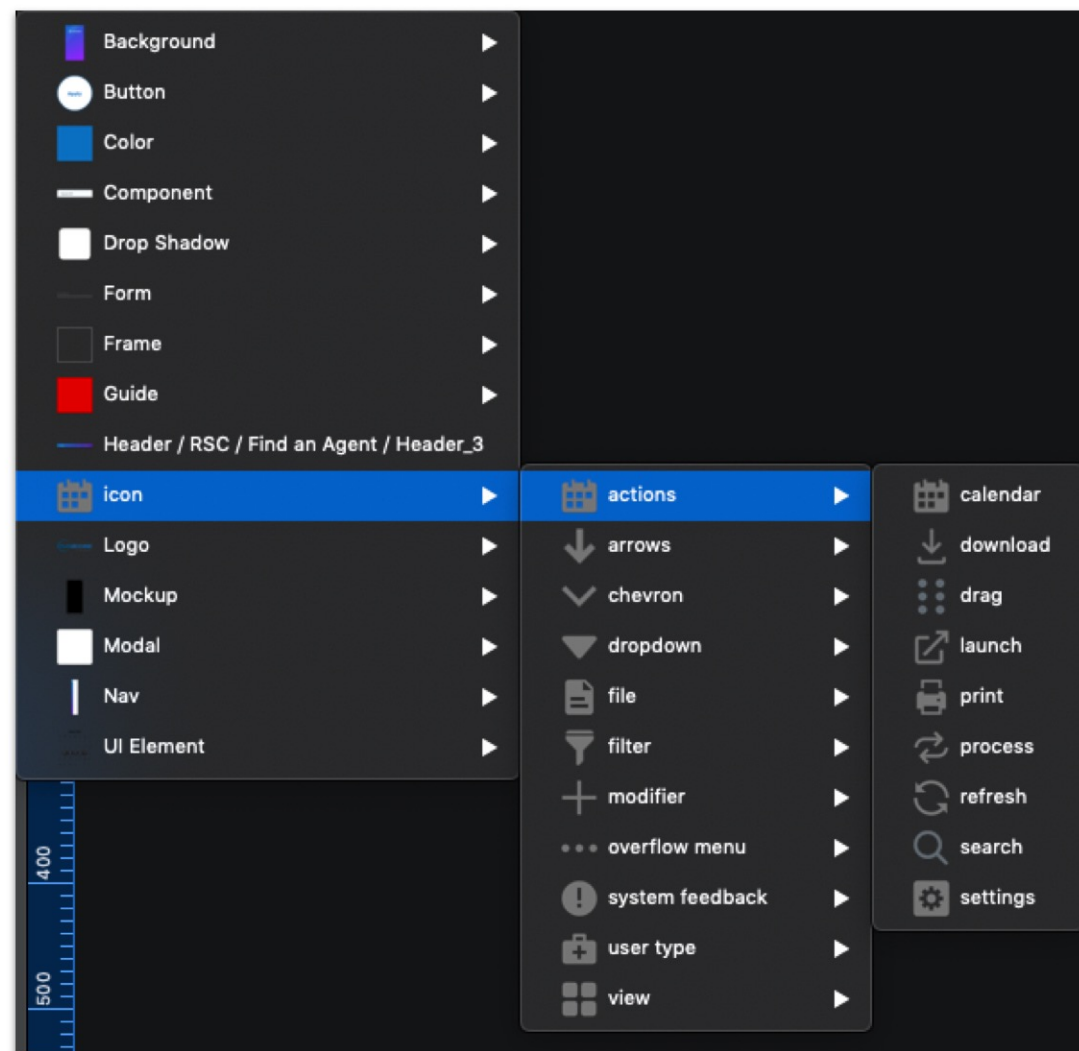

NOTE: Always click the “header text” to your artboard you want to “Copy & Paste” - otherwise most of the interior layers will add the word “copy” to everything in that new artboard.

Icon:

Designers and Developers need icons that are frequently used in an easy to find organized menu. We have narrowed down our currently most used icons into Actions, Arrows, Chevrons, Dropdown, File, Filter, Modifier, Overflow Menu, System Feedback, User Type and View.

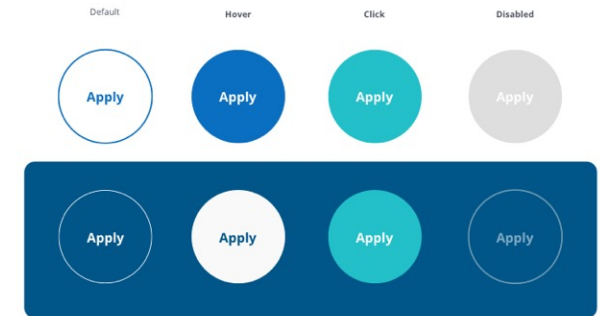

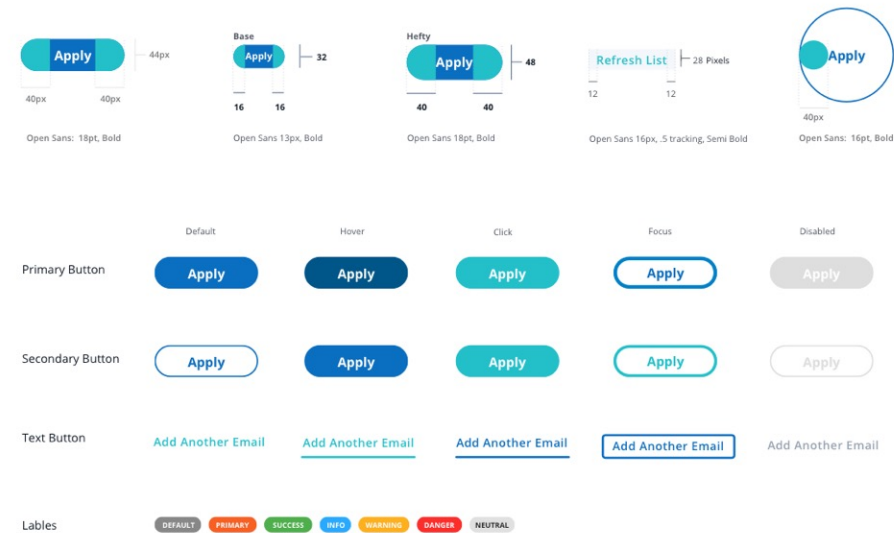

To insert an icon please navigate to the **"Insert + / Symbols: Document / Icon >"** If you need additional icons, please search the **"6. Icons"** page for all 4000 options.

Component:

Developers often need elements that have been pre-built and have special rules about usage, spacing, padding, etc

To insert any component please navigate to the **“Insert + / Symbols: Document / Button or Components >”** If you need additional elements - please request them through the Visual Designer that created your design system.

Responsive Grid:

Apple Devices (Portrait)					Active Area	
Device	Orientation	Width (px)	Height (px)	Outer Margins (px)	Width (px)	Height (px)
iPhone 8	Portrait	375	667	18	340	664
iPhone 8 Plus	Portrait	414	736	23	360	664
iPhone X	Portrait	375	812	18	340	728
iPhone SE	Portrait	320	568	4	312	568
Android Devices (Portrait)					Active Area	
Device	Orientation	Width (px)	Height (px)	Outer Margins (px)	Width (px)	Height (px)
Android	Portrait	360	640	16	328	632
Pixel 2	Portrait	412	732	22	368	728
Pixel 2 XL	Portrait	360	720	16	328	712
Galaxy S8	Portrait	360	740	21	328	768

The strength of HCSC enables our members to live fearlessly, free of worry and uncertainty.

“Our members are protected with the compassion of a cross, the security of a shield and the wisdom and guidance of over 80 years of experience, combined with the power of a card that opens doors in all 50 states”

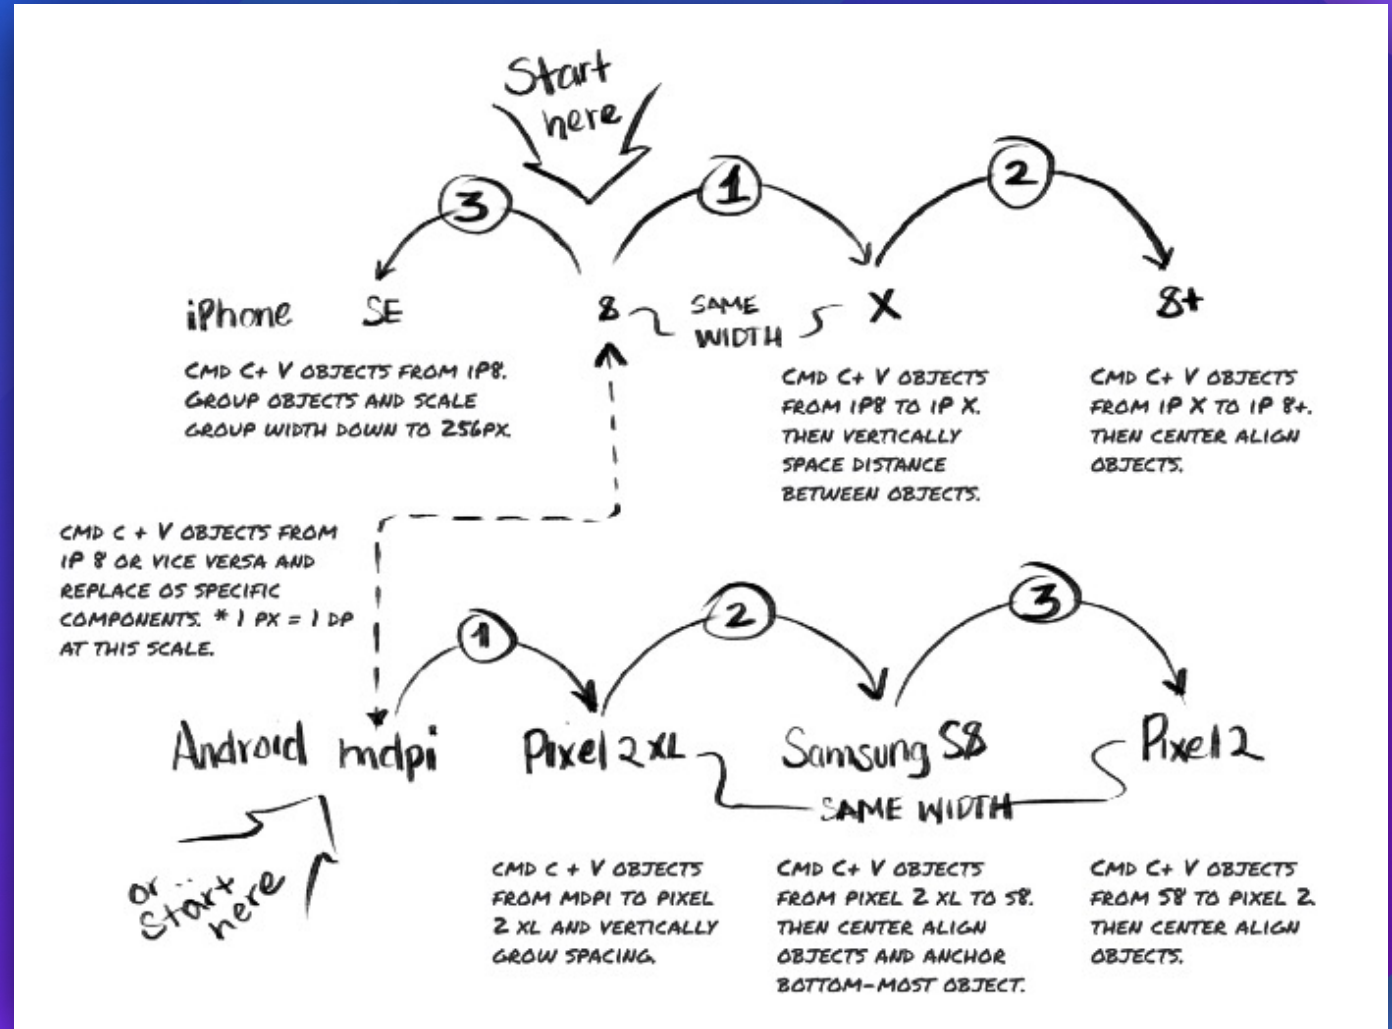

We were inspired by words such as security, wisdom, exploration, empathy, clarity and understanding and have honed these themes to create three distinct design directions. Three strands that, when woven together, are not easily broken:

Protection, Guidance. & Compassion.
